

# Flexible medium voltage cable PROTOLON(SC)<sup>®</sup> (N)TSCGEWOU

**Application:** The cables are suitable for use in high voltage shore connection systems (HVCS), on board the ship and on shore, to supply the ship with electrical power from shore, using control cores and fiber optics to adapt different type of vessels. The cables can be manufactured to order or project-specific with E9/125, 50/125 or 62.5/125 fibres.

## Construction and technical data:

- Three core laid around a central support element. Earth conductor, screened control element and filler positioned in the interstices.
- Screened control element: control cores and multi fiber loose buffer laid around a central support element. Screen made of aluminium tape with tinned copper drain wire.
- Central support element: Kevlar yarns and rubber covering

**Conductor material:** copper, bare

**Conductor construction:** Class 5 = flexible

**Insulation:** rubber (EPR) 3GI3

**Electrical field control:** inner and outer semiconducting rubber layer

**Material inner sheath:** EPR

**Self-supporting element:** aramide

**Sheathing material:** rubber 5GM5

**Flame-retardant:** VDE 0482-332-1-2/IEC 60332-1-2

**UV-resistant:** yes

**Oil-resistant:** EN 60811-404

**Ozone-resistant:** yes

**Max. temperature at conductor, °C:** 90 °C

**Max. short circuit temperature at conductor, °C:** 250 °C

**Permitted outer cable temperature, fixed, °C:** -40 - +80 °C

**Permitted outer cable temperature, moved, °C:** -25 - +80 °C

**Bending radius, moving application:** 10 x Ø

**Maximum tensile strength at the conductor:** 25 N/mm<sup>2</sup>

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

**Nominal voltage Uo:**

6 kV

**Nominal voltage U:**

10 kV

**Maximum permitted operating voltage in**

12 kV

**three-phase systems:****Test voltage:**

21 kV
