

Fiber Enclosures – High Density 1U Fiber Connect Panel

Siemon is implementing a change to our High Density Fiber Connect Panel to increase the incoming cable capacity. The rear of the enclosure changed from having (2) entry points to (4) effectively doubling the amount of cable that can be installed into the enclosure on one side. This eliminates the need to have to route the cable to both sides simplifying the installation.

AFFECTED PRODUCTS

| Discontinued Part Number | New Part Number | Description |
|---------------------------------|------------------------|--|
| FCP3-DWR-4 | FCP3-DWR-4A | High Density 1U Fiber Connect Panel, Black |

AVAILABLE STOCK

- Original design will continue to ship until our stock is used up. By the end of Q4 2014 is the projected timing for this change to be implemented.
