product description: halogen-free double-coated drainage pipe designed for all areas of drain technics, e.g. draining of buildings, deep engineering constructions, sport area building, in agriculture, gardens, to drain areas of use, or for temporary draining of work sites
 drainage pipe is of the type R2 - circular tube with a smooth or undulating inner surface and profiled outer surface
 each drainage pipe contains a coupling on one end
 the product may be subject to ordinary surface mechanical damage (marks, dents, scratches and rib deformation) of the outer wall of the pipe due to manufacturing technology or transport, which do not affect the functionality of the product
